

ACTIVIDAD DEL TEMA 9

Arturo Albero Gabriel

Esta actividad es realmente guiada y lo único que he tenido que hacer ha sido seguir los pasos. En mi caso, además, de forma previa he tenido que realizar una migración para borrar Employees y borrar el modelo antiguo para poderlo suplantarlo por el nuevo.

CAPTURA DEL CÓDIGO DEL MODELO, FACTORY Y SEEDER

MODELO

```
<?php

namespace App\Models;

use Illuminate\Database\Eloquent\Factories\HasFactory;
use Illuminate\Database\Eloquent\Model;

11 references | 0 implementations
class Employee extends Model
{
    use HasFactory;

    0 references
    protected $fillable = [
        'name',
        'email',
        'department',
        'salary'
    ];
}
```

FACTORY

```
<?php

namespace Database\Factories;

use App\Models\Employee;
use Illuminate\Database\Eloquent\Factories\Factory;

/**
 * @extends Factory<Employee>
 */
0 references | 0 implementations
class EmployeeFactory extends Factory
{
    /**
     * Define the model's default state.
     *
     * @return array<string, mixed>
     */
    0 references | 0 overrides
    public function definition(): array
    {
        return [
            'name' => $this->faker->name(),
            'email' => $this->faker->unique()->safeEmail(),
            'department' => $this->faker->randomElement(['IT', 'HR', 'Marketing', 'Sales', 'Finance']),
            'salary' => $this->faker->numberBetween(20000, 60000),
        ];
    }
}
```

SEEDER

0 references | 0 implementations

```
class DatabaseSeeder extends Seeder
{
    use WithoutModelEvents;

    /**
     * Seed the application's database.
     */
    0 references | 0 overrides
    public function run(): void
    {
        // User::factory(10)->create();

        $this->call(EmployeeSeeder::class);
    }
}
```

```
<?php
```

```
namespace Database\Seeders;
```

```
use Illuminate\Database\Console\Seeds\WithoutModelEvents;
```

```
use Illuminate\Database\Seeder;
```

```
use App\Models\Employee;
```

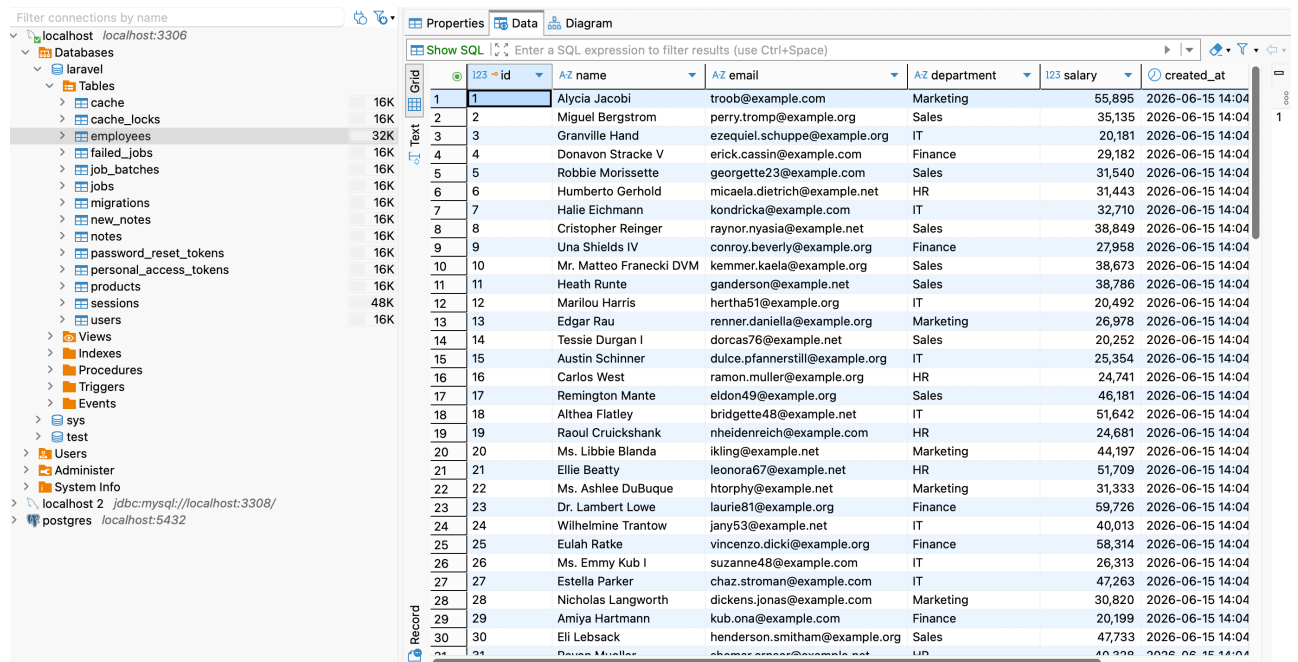

1 reference | 0 implementations

```
class EmployeeSeeder extends Seeder
```

```
{
    /**
     * Run the database seeds.
     */
    0 references | 0 overrides
    public function run(): void
    {
        //
        Employee::factory()->count(100)->create();
    }
}
```

CAPTURA DE LA TABLA EMPLOYEES MOSTRANDO AL MENOS 10 REGISTROS GENERADOS

	id	name	email	department	salary	created_at
